

Dr. André Freiling

André Freiling is employed at EADS Airbus Germany since February 1999. He is in charge of coordinating research and development programmes dealing with new fire detection technologies within the pressurized area of the fuselage. Currently, he is in charge of technical coordination of a R&D programme funded by the European Community called FireDetEx, which started in February 2000 and ends in 2003.

Other tasks correlated to new technologies are qualification/certification activities as well as aircraft integration studies.

Education:

PhD in Applied Physics in Feb. 1998, Institute of Applied Physics, University of Gießen, Germany

Doctoral Thesis on semiconducting gas sensors for food freshness monitoring
