

Dieter Reisinger--Bio

Dr. Dieter Reisinger has joined Lauda-Air in August 1996 as a First Officer and has held the position of Flight Safety Manager since January 1999. He was promoted Director Safety and Quality just recently (in May 2001) and as such is responsible to the authority for maintaining the airlines Safety and Quality Program. He is currently flying as First Officer on the B 767.

Mr. Reisinger prior to his airline career worked as a research engineer in supersonic aerodynamics and aircraft design and holds a doctorate in aerospace engineering. In his spare time he frequently teaches aerodynamics in Air Transport Pilots Coursers. He also participates in design meetings at a major aircraft manufacturer and is a member of AIAA (American Institute for Aeronautics and Astronautics) and DGLR (Deutsche Gesellschaft für Luft-und Raumfahrt).
