

## Mac McLean– Bio

Dr. G. A. 'Mac' McLean is an Engineering Psychologist and Principal Investigator for Cabin Safety Research at the FAA Civil Aerospace Medical Institute (CAMI). He has also served as Chairman of the SAE Cabin Safety Provisions Committee. He has investigated the effects of stressors, workload, high altitudes, noxious atmospheres, and ergonomic factors on human physiology and performance. Much of his work at CAMI has involved emergency evacuation of transport category airplanes and human factors related to emergency procedures and equipment. Mac has consulted nationally and internationally in the development of protective equipment and emergency procedures for civil and military aviation.
