

Chuck Huber - Bio

Chuck Huber is the FAA's Transport Airplane Directorate Program Manager for Safety Management. He has been a member of the Aircraft Certification (AIR) Safety Management Program Team for the past three years working to develop and implement a safety management system in AIR within a standardized approach throughout all Aviation Safety (AVS) services and offices. Mr. Huber is also a member of the AVS SMS Working Group and a co-lead of the AVS SMS Enterprise Architecture Team. He is also a member of the JPDO SMS Standards team that is developing a national level SMS Standard. Previously Mr. Huber has worked as an aerospace engineer in the Seattle Aircraft Certification Office and an engineer and manager in the Transport Standards Staff responsible for systems and equipment certification and rulemaking.
