

Mr. Douglas A. Ingerson

Doug has been involved with fire protection in some aspect since 1982. In 1993 he earned a B.S. Degree in Fire Protection Engineering from the University of Maryland at College Park. Between 1982 and 1993, his experiences included :

1982 – 1986, aircraft/structural firefighter, U.S. Air Force

1986 – 1993

- intermittent student
- structural firefighter Valparaiso, FL & College Park, MD
- miscellaneous employment with the Hughes Associates, the Department of Fire Protection Engineering, University of Maryland, College Park, the New England Fire Equipment Company, and the Federal Aviation Administration

Since being hired by the FAA at the WJ Hughes Technical Center in 1994, he has preformed as a testing engineer working with continued airworthiness and halon replacement issues. Halon replacement in aviation propulsion has been his principle focus since 1996.
