

**Serge LE NEVE (DGA/CEAT)**

**The CEAT (Toulouse Aeronautical Test Center) is an establishment of the French Ministry of Defense but it has a dual experience as it shares its activity between civil & military programs.**

**With a “Materials” & “Thermo-dynamical of aerospace engines” training, my experience is the following :**

**From 1987 to 2004, I mainly worked as a “Materials R & D Manager” on the following civil & military programs : Airbus / Mirage 2000 / RAFALE / TIGRE / NH90, with a break from 1990 to 1992 for Engine Certification at DGAC / Airworthiness Department. My experience as “Materials R&D Manager” concerns the following areas : engine materials, transparent & polymer materials, lightning protection, stealth materials, cabin materials.**

**Since 2004 I am the head of the Fire Safety Department.**

For more details if necessary :

1987-1990 : Materials R & D manager (engine materials) (DGA/ Aeronautical Programs Office)
