

Ms Madeleine Togher

Ms Madeleine Togher completed a BSc in Computing Science at the University of Greenwich in 2002. Following her first degree, Madeleine joined the Fire Safety Engineering Group (FSEG) of the University of Greenwich to undertake doctoral research in evacuation modelling. Her PhD research topic concerns representing the exiting decision making process within aircraft evacuation models. As part of her research Madeleine has developed a questionnaire to help determine how passengers frame their exiting decisions. Madeleine has also worked on evacuation modelling projects relating to the AIRBUS A380 and BOMBARDIER aircraft.
