

Amanda Dodd is a Senior Member of Technical Staff at Sandia National Laboratories in Albuquerque, NM. Amanda joined Sandia National Laboratories in 2003 with a B.S. (2001) and M. S. (2003) in Mechanical Engineering from The University of Texas at Austin. Amanda received her PhD in Mechanical Engineering in 2009 from UC Berkeley. Amanda's expertise is in decomposition of solid materials, combustion, and heat transfer. Amanda's research areas include modeling and simulation of combustion in porous media, thermal decomposition of organic materials, and smoldering and transition to flaming of porous materials.
