

## **Rebecca Grant PhD MSc BA (Hons)**

Dr Rebecca Grant is a Lecturer working within the Systems Engineering and Human Factors Department at Cranfield University in the UK. Research activities within cabin safety, emergency evacuation, cabin design and passenger behaviour have been conducted at Cranfield University for over 20 years. Rebecca joined the staff at Cranfield University in 2001 following a first degree in Psychology and English and an MSc in Applied Psychology. Rebecca's doctoral research explored factors influencing emergency evacuation and overwing exit operation in smaller transport aircraft. Rebecca's main research interest is in human factors within aircraft cabin safety, and she has worked on numerous projects in the areas of emergency evacuation, passenger behaviour in emergencies, cabin crew operations and passenger safety information for regulators, manufactures and operators. Rebecca is a registered Occupational Psychologist and a graduate member of the Institute of Ergonomics and Human Factors.
