

Dr. Robert Harrison is Clinical Professor of Medicine at the University of California, San Francisco. He is board certified in both Internal Medicine and Occupational Medicine, and has diagnosed and treated patients with work-related exposures and injuries for over 25 years. He oversees NIOSH-funded research and surveillance projects in workplace health and safety among numerous high-risk occupations, and has served on the California Safety and Health Standards Board. He has evaluated and treated airline cabin crews with bleed air exposures, and has developed a physicians guide to assist in prompt recognition and followup of these episodes.
