

Dr. Edgar A. Mendoza: **Chief Executive Officer/President
Redondo Optics Inc.**

Education: **Ph.D. – Phys. Chem. - CUNY 1992**

Career Summary:

Dr. Mendoza is the Founder, President, and Chief Executive Officer of Redondo Optics, Inc. (ROI). Dr. Mendoza received his B.S. in chemistry from Buffalo State College, NY. He attended the City University of New York, where he received an M.S. and Ph.D. in Physical Chemistry, with emphasis on development of ultra-fast instrumentation for investigation of real-time photochemical processes in the solid state. Later he joined Physical Optics Corporation (POC), as a Director of the Advanced Fiber Optics Department. From POC he joined Intelligent Optical Systems, Inc., (IOS) as a Director of the Sensor Devices and Materials Department. At POC and IOS he as Principal Investigator and Project Manager for the research and development of novel fiber optic instrumentation and sensors, integrated optic devices, as well as other optical devices. From IOS, Dr. Mendoza founded OptiNetrics, Inc, a venture capital star-up company focused in the development and manufacturing of planar lightwave circuits and telecommunication components. From OptiNetrics, Dr. Mendoza founded Redondo Optics Inc. and is currently leading this company to position it as a world leader fast growing emerging markets based on ROI's patented nano-technology and advanced optical instrumentation. At ROI, he manages the overall business and commercialization strategy for the company addressing fast growing markets in the fields of nanotechnology, life sciences, renewable energy, semiconductors, displays and illumination, and telecommunications. Dr. Mendoza has over 50 publications, 6 US awarded patents, 12-pending patents, and has presented his work in numerous international technical conferences on solid-state chemistry, materials science, advanced monitoring instrumentation, and integrated optics.
