

Dr. Suresh Keshavanarayana (Raju) is an Associate Professor in the Department of Aerospace Engineering, Wichita State University. Dr. Raju's interests include damage tolerance of sandwich structures, rate sensitivity of composite materials, and fatigue of fastener joints. Dr. Raju has been involved in the experimental investigation on the rate sensitivity of composite materials for crashworthiness applications. Dr. Raju received his B.S. in Mechanical Engineering from Bangalore University, India and PhD in Aerospace Engineering from Wichita State University.
