

## BIOGRAPHY

Dr. Andy Self is a Research Physiologist, and heads the Environmental Physiology Team at CAMI. He received his Ph.D. in Animal Physiology from Washington State University, and spent a career in the Air Force, where he was involved in acceleration research, and taught physiology at the Uniformed Services University. He also served as the Chief of Aerospace Physiology in the School of Aerospace Medicine at Brooks AFB. After retiring from active duty, he taught undergraduate chemistry and pursued research on screening for sub-clinical cardiovascular disease in Hispanic children in the San Antonio Diocese schools. Dr. Self joined CAMI in 2009, and is actively pursuing research in aircraft passenger and crew protection from the extreme environment at very high altitudes.
