

KENNETH SUSKO - BIO

Kenneth Susko
President/Owner
Aviation Safety Facilitators Corp.

Ken Susko currently owns and operates Aviation Safety Facilitators Corp. (“ASF”). ASF was established in 1999 for the purpose of developing safety solutions for both military and commercial aircraft. Several solutions developed and patented by ASF include an on-board oxygen monitoring system, fuel tank inerting system as well as a cargo hold fire detection and suppression system. These applications have also been identified to be useful in areas such as Petroleum Process and storage facilities (ships, barges and land vehicles), to name a few.

Mr. Susko has extensive experience in all aspects of aircraft maintenance and control systems having been in the US Navy/Naval Reserve for over 25 years specializing in aircraft and maintenance as well as being a Flight Engineer and Submarine Warfare Technician. For over 20 years, he worked for United Airlines on Ground Service Equipment and Facility Maintenance, which included special expertise in trouble shooting techniques and the design of special tooling utilized to correct complicated aircraft maintenance issues. In conjunction with Mr. Susko’s other responsibilities, he has worked as a consultant in the field of Control Systems. He designed and constructed special applications for equipment and control systems utilized in laboratory clean rooms, sterile environments and aircraft deicing.

Ken Susko owns several US Patents, as well as Foreign Patents, pertaining to Oxygen Monitoring, On-Board Fuel Inerting as well as Aircraft Deicing. He has participated in different FAA Advisory Groups which resulted in his comments being incorporated into Federal Regulation. He has also been quoted in numerous trade articles.
