Luca Chittaro

Luca Chittaro is full professor of Human-Computer Interaction (HCI) in the Department of Mathematics and Computer Science of the University of Udine, where he heads the HCI Laboratory (http://hcilab.uniud.it), which he founded in 1998.

His major research interests are in the area of human-computer interaction, particularly in virtual reality, mobile devices, training systems, persuasive technology, and their applications in health and safety. He has authored or co-authored over 160 academic publications. He has designed software applications for Emergency Medical Services and Firefighters.

He has received research grants from a wide range of organizations, including the European Union (EU), the US Federal Aviation Administration (FAA), the Italian Ministry of University and Research (MIUR), and companies such as the Benetton Group.
