

DHAVAL DADIA – BIOGRAPHY

Dhaval Dadia works at the Federal Aviation Administration Technical Center's Systems Fire Safety Branch. As a Research Engineer he is in charge of finding various cost effective methods to suppress fires in Class-E Cargo Compartments. He has worked in conjunction with the industry to identify a promising solution that can affect the fire safety in cargo planes in a positive manner. He is a graduate of Rutgers University where he acquired his B.S. as well as M.S. in Mechanical Engineering. He attended graduate school under a fellowship grant sponsored by the F.A.A. His master's thesis involved predicting flammability conditions within wing fuel tanks.
