

Ilya Ostrovsky

Ilya Ostrovsky is graduated engineer of chemistry and technology (M. Sc.) with specialty: technology of plasma-chemical industries.

- Since 2013, Ilya Ostrovsky is Technical Manager of Lightweight Materials in Chemetall GmbH

He has more than 20 years experience in the development of nano-technologies and is an inventor of two new types surface treatment technologies for light metals: Plasma-Gel Anodizing and Composite coatings, patented by Chemetall GmbH, as well as 14 years of experience in light metals surface treatment for aerospace industry. Mr. Ostrovsky has been involved in R&D and industrial projects with EADS IW, Airbus, Boeing, Dassault Aviation, AgustaWestland, IAI, Eurocopter, RAFAEL.

Ilya Ostrovsky has several scientific publications regarding nano-technology and metal surface treatment, and numerous patents in USA, EU, Russia, Israel and China.
