

Steve Rehn

Bio

Steve Rehn is a graduate student at Rutgers University going for his M.S. in Mechanical Engineering under a fellowship grant from the Federal Aviation Administration. He is currently researching hydrogen flammability limits at sub-atmospheric pressures and reduced oxygen concentrations. He started working at the FAA Technical Center in April 2011 as an engineering co-op from Drexel University where most of his work concentrated on aiding in the development of the next-gen sonic oil burner. He then graduated from Drexel in June 2012 with a B.S. in Mechanical Engineering.
