

Al Carlo

Al is the Boeing Commercial Airplanes Pressurized Compartment Fire Marshal with the responsibility to support all fireworthiness issues, support accident/incident investigations involving fires, participate in rulemaking activities and to provide design engineers a resource to obtain the guidance necessary for selecting materials and system designs that comply with the fireworthiness design criteria for use inside the pressurized envelope of Boeing commercial airplanes. Al is also an FAA AR (Authorized Representative) for Fire Protection to find compliance to FAR/CS 25 for Fire Suppression and Detection.

Al has been with Boeing Commercial Airplanes since graduating from Washington State University with a Bachelor of Science degree in Mechanical Engineering in June 1985.
