

Jim Davis has recently finished his appointment as Co-Chair of the Materials Flammability Working Group formed by the Aviation Rulemaking Advisory Committee (ARAC).

Mr. Davis is the CEO of AccuFleet, a national aviation support vendor, and the world's largest handler of airline upholstery, with full fleet coverage of both United Airlines and American Airlines. He is on the Board of Airline Fabricare Systems, as well as the Board of The Jones Partners, associated with Rice University's Jones School of Business. A Federal Aviation Administration Designated Engineering Representative for more than 20 years, Mr. Davis has developed and operated the premier independent aircraft fire safety testing facility in the U.S.

Mr. Davis enjoys designing and manufacturing custom software and equipment solutions for the industry, thus providing high-yield, innovative solutions for airfield support. Spare time is filled with fast cars and racing triathlons.

Prior to joining AccuFleet, Mr. Davis was a consultant with Price Waterhouse and an engineer at Texas Instruments. Mr. Davis earned a Master of Science in Operation Research and a Master of Business Administration, both from Southern Methodist University. He earned his Bachelor of Science in Electrical Engineering from Rice University.
