

Dr. Dominic Henry

Dominic is currently working as Supplier Qualification Manager for the Aircraft Interiors Team at Magnesium Elektron in the UK. He has worked at the company for 9 years, predominantly within the Technical Department. During this time he has made a significant contribution to the optimisation and development of wrought magnesium alloys for use in the aerospace and biomedical industries. His current role is focused on ensuring that enabling technologies and supply chain options are in place, and qualified, to support the use of Elektron magnesium alloys in aircraft interiors applications.

He has a strong background in Materials Science and Technology, with a B.Eng from the University of Birmingham, UK; an MSc in Lightweight Materials Engineering from the University of Manchester, UK; and a PhD on Wrought Magnesium Alloys also from the UoM. He recently graduated with distinction from his MBA studies, where he focused his research dissertation on supply chain management in the aerospace industry.
