

Britta Henselmeyer is a Designated Certification Specialist (DCS) for Cabin Safety at Airbus Operations GmbH. She is responsible for cabin certification including cabin interior, emergency equipment, evacuation capability and placards/markings for the A330/A340 fleet and placards/markings for the A350 fleet at Type Certification. In addition she is acting as Compliance Verification Engineer (CVE) for Cabin Safety for changes to the Type Design. As part of the Airworthiness function she is performing the Independent Check of all documents (for the above mentioned scope) produced by the Airbus Design Organisation to show compliance with the applicable airworthiness and environmental protection requirements.

As part of the pictogram project team she was coordinating the certification activities with EASA/FAA and CAMI.

Previously Britta was a development engineer for cabin lining. In this role she was developing special first class linings and leading the team for Airbus freighter courier area lining.

Britta holds a degree in Mechanical Engineering from the Hamburg University of Applied Sciences.
