

Thomas Krause, PhD

Thomas Krause, Ph.D., has been working in the field of aircraft fire safety since 2012. As an engineer at the Airbus fire test laboratory in Bremen, Germany, he is working on the development of internal fire safety requirements, test method documentation and the qualification of external fire test laboratories working for Airbus. His field of research comprises hidden area fires, testing of electrical devices located therein and fire properties of 3D printed parts. He holds a diploma in science of non-metallic inorganic materials from Clausthal University of Technology as well as a doctoral degree in ceramic engineering from the University of Bremen.
