

Robert Ochs, PhD

Robert Ochs, PhD, is a research engineer for the FAA Fire Safety Branch with 15 years of experience in aircraft fire safety in the areas of fuel tank flammability, minimum ignition energy of explosive mixtures, development of the next-generation fire test burner, composite fuselage flammability, advanced fluid flow visualization techniques, and fire-related aircraft accident investigation. He has a B.S., M.S., and PhD. from Rutgers, The State University of New Jersey, in Mechanical & Aerospace Engineering with specialization in thermal and fluid sciences.
