

Dr. Rajiv Tandon

Rajiv had over 20 years of experience in process and technology leadership roles in powder based manufacturing technologies. He has lead technical teams in areas of high volume precision manufacturing via metal injection molding in applications including medical devices, telecom, firearms, and thermal management. Rajiv joined Magnesium Elektron in 2009 and is currently Research and Development Manager. He is responsible for leading efforts in development and commercialization of magnesium alloy powders. He has over 40 publications and actively serves on technical and standards committees.
