

Kai Bredemeier

**Architect for Safety & Security Systems
AVSEC Professional Manager**

AIRBUS

Kai is an Architect for Cabin & Cargo Safety & Security Systems continuously seeking for improving aircraft systems as well as overall aircraft operation. His main scope covers doors, evacuation slides, cockpit door locking systems, video monitoring systems, cabin comfort systems, cargo lighting and cabin power.

Kai has gained a wide experience in the initial design and concept of aircraft systems, ground and flight testing, aircraft security, certification, cabin and aircraft operation and of course - cabin safety. He is always open-minded about new concepts and meeting people willing to further improve aircraft security, cabin safety and operation.

Kai was successfully certified as AVSEC Professional Manager by ICAO jointly with Concordia University and John Molson School of Business in 2017.
