

Jim Davis recently finished his appointment as Co-Chair of the Materials Flammability Working Group formed by the Aviation Rulemaking Advisory Committee (ARAC). In August, 2019 the FAA issued an NPRM to incorporate the results of the Working Group's recommendations into aviation safety regulations.

Mr. Davis is the CEO of AccuFleet, a national airline ground handling vendor, and the world's largest handler of airline upholstery, with full fleet coverage of both United Airlines and American Airlines. He is on the Board of Airline Fabricare Systems, which leases aviation interior products. A Federal Aviation Administration Designated Engineering Representative for more than 30 years, Mr. Davis has developed and operated AccuFleet Testing Services, a globally recognized, ISO-certified independent aircraft fire safety testing facility.

Prior to joining AccuFleet, Mr. Davis was a consultant with Price Waterhouse and an engineer at Texas Instruments. He earned his Bachelor of Science in Electrical Engineering from Rice University, and then earned a Master of Science in Operation Research and a Master of Business Administration, both from Southern Methodist University.
