

Dr. Richard Fox is an Engineering Fellow and has been with Honeywell for over 33 years. Dr. Fox, in his current role, is responsible for collaborating with regulatory authorities on issues related to aircraft cabin environment. In addition, he has been held leadership roles on several Aerospace standardization committees and oversees Advanced Technology programs that are being conducted in the UK and Germany. In addition, he supports production programs to assist in certification issues for fuel tank inerting systems. Dr. Fox was appointed to the Honeywell Corporate Sensors Council early in 2019 and helps identify very low level sensing technologies that would be suitable for operation in aircraft operating environments.
