

Doug Ingerson:

Since being hired by the FAA at the WJ Hughes Technical Center in 1994, Doug has functioned as a testing engineer working with continued airworthiness and halon replacement issues. Halon replacement in aviation propulsion has been his principle focus since 1996.

Doug has been involved with fire prevention & suppression since 1982. In 1993 he earned a Bachelor of Science Degree in Fire Protection Engineering from the University of Maryland at College Park. Between 1982 and 1993, his experiences include aircraft/structural firefighter in military and civilian fire departments, student, and miscellaneous employment with the Hughes Associates, the Department of Fire Protection Engineering, University of Maryland, the New England Fire Equipment Company, and the Federal Aviation Administration.
