

Thomas Krause, PhD

Thomas Krause has been working in the field of aircraft fire safety since 2012. As a Materials - Fire Safety Expert at the Airbus Airframe Engineering Centre of Competence, he is working on the development of internal fireworthiness requirements, test method documentation and the qualification of fire test laboratories. His field of research comprises fire safety properties of additive manufacturing polymers, alternative means of compliance and test methods for electronic components. He holds a diploma in science of non-metallic inorganic materials from Clausthal University of Technology as well as a doctoral degree in ceramic engineering from the University of Bremen.
