

At one time or another in his thirty-five years at Northrop Grumman, Greg Roberts has been responsible for the fire protection system for numerous military aircraft programs. His work also includes being Northrop Grumman's primary investigator for both the Halon 1301 replacement testing for the F/A-18E/F program and Northrop's Advanced Fire Barrier Test Stand. Greg received his B.S. in Engineering from Harvey Mudd College and his M.S. in Aerospace Engineering from California Polytechnic University, Pomona.
