

Peter is currently a 27-year senior cabin crew member advocating airline safety through NASA's Aviation Safety Reporting System (ASRS), and reporting through his company's Safety Management System (SMS). Peter's skill set is built from over 30 years of major carrier experience where his most recent title was Sr. Analyst/Cabin Safety at American Airlines. This included more than ten years of training and policy research development/implementation. As a past representative on IATA's Cabin Safety Operations Committee, Peter liaised with government and industry safety stakeholders driving both internal and global cabin safety standards. He is also an accredited member of the International Society Air Safety Investigators (ISASI).

In 1986, Peter began his airline career in the airport thus rounding his industry knowledge from the ground up.
