

## SAE AS6826 Powerplant Fire Test Standard and FAA AC20-135 Update

John Ostic – Boeing  
Phil Dang - Honeywell

SAE Committee A-22 is developing a new powerplant fire test standard, AS6826. This standard will provide instructions and guidance for all aspects of powerplant fire testing including test equipment, flame calibration, setup, boundary conditions, and pass/fail criteria. The standard is intended to provide a basis to update FAA Advisory Circular AC20-135.
