

DAVID S. WROTH

Director, Data Science
Underwriters Laboratories Inc.

David Wroth is the Director of Data Science for Underwriters Laboratories Inc., using data to identify opportunities to address safety issues across the globe. He leads a team that collects and analyzes data from disparate sources and develops insights to improve standards that support safe living and working environments for people. The team is leveraging natural language processing for improving safety standards and employing machine learning algorithms to rapidly identify safety issues from text sources.

Previously, Mr. Wroth was the director of public safety, responsible for leading key initiatives of the Public Safety Office and integrating these functions with other UL organizational programs. David received a Master of Business Administration from Lake Forest Graduate School of Management and a Bachelor of Science in Nuclear Engineering from Purdue University.
