

HR2 Zone Heater Development Update

International Aircraft Materials
Fire Test Forum Meeting

April 2021

MarlinEngineering

HR2 Zone Heater Development Update

Background

Zone Heater was developed to eliminate Globars and to provide a more uniform and safer heater assembly

HR2 Zone Heater Development Update

Background

Zone Heater was developed to eliminate Globars and to provide a more uniform and safer heater assembly

First prototype used two heating zones

HR2 Zone Heater Development Update

Background

Zone Heater was developed to eliminate Globars and to provide a more uniform and safer heater assembly

First prototype used two heating zones

FAA tests showed more efficient heating (less current) but not enough zonal adjustment

HR2 Zone Heater Development Update

Background

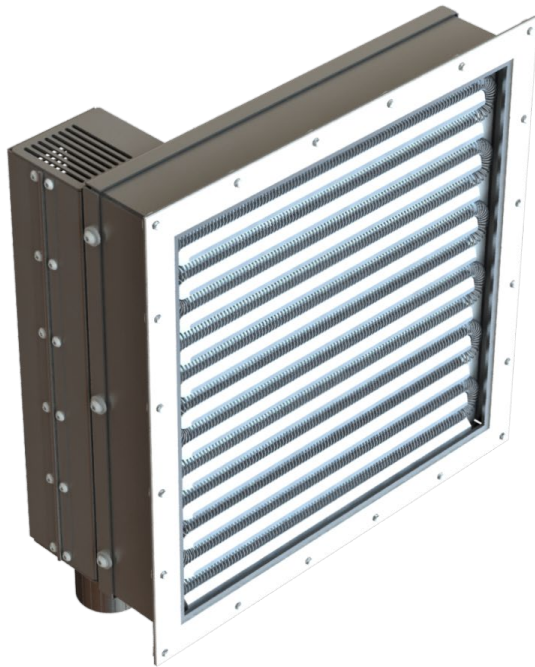

Zone Heater was developed to eliminate Globars and to provide a more uniform and safer heater assembly

First prototype used two heating zones

FAA tests showed more efficient heating (less current) but not enough zonal adjustment

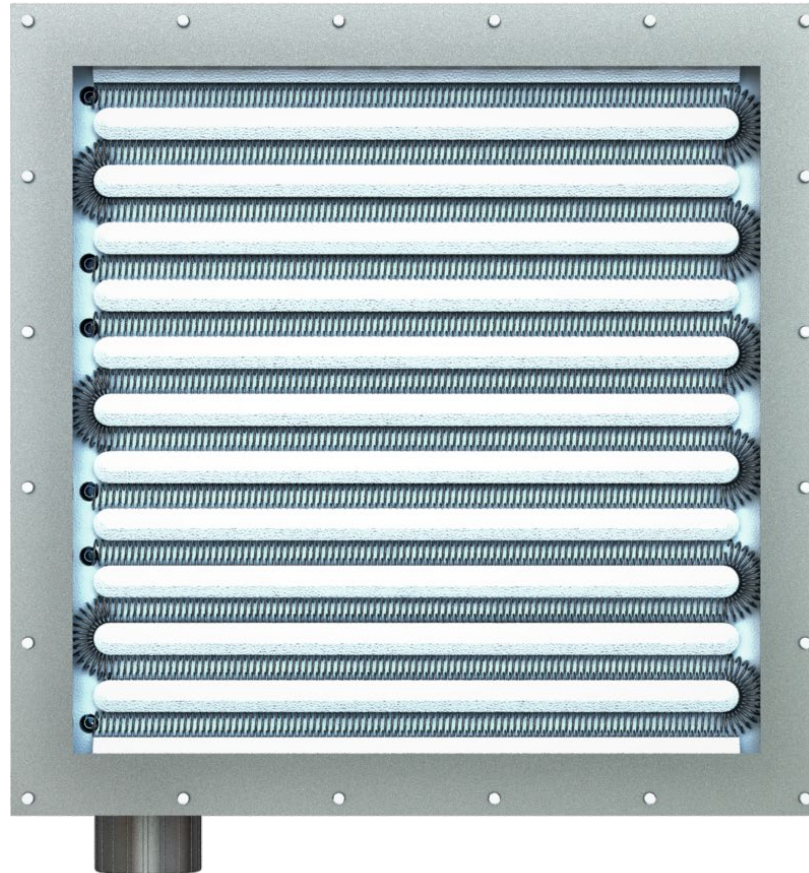

Three zone unit manufactured with three different resistances

HR2 Zone Heater Development Update

HR2 Zone Heater Development Update

HR2 Zone Heater Development Update

Heater tested using regulated power supplies with 48VDC output

HR2 Zone Heater Development Update

Heater tested using regulated power supplies with 48VDC output

FAA would like to use the lower resistance element

HR2 Zone Heater Development Update

Heater tested using regulated power supplies with 48VDC output

FAA would like to use the lower resistance element

Unit modified as requested and sent to Technical Center for further evaluation

HR2 Zone Heater Development Update

Heater tested using regulated power supplies with 48VDC output

FAA would like to use the lower resistance element

Unit modified as requested and sent to Technical Center for further evaluation

New heater will be installed and tested May 2021

HR2 Zone Heater Development Update

Heater tested using regulated power supplies with 48VDC output

FAA would like to use the lower resistance element

Unit modified as requested and sent to Technical Center for further evaluation

New heater will be installed and tested May 2021

Results will be provided at next Forum
