Radiant Panel News

- PMI is purchasing the parts (emitter strips and casings) from Watlow and fabricating the Radiant Panels.
- PMI will continue working with the FAA to ensure adherence to the tight specifications.
- The new radiant panel fabricated by PMI was delivered to the Tech Center in early May.
- The panel and the new thermocouple were installed in the test chamber and calibrated.
- The panel was then removed and shipped to Triumph Insulation Systems (formerly the Mexmil Company) for calibration.
- The panel is currently in transit to Lamart for calibration.
- Setpoint and chamber temperature data will be tabulated to ensure there is no significant variations.
