

Aircraft Wiring

Pat Cahill

Engineer, Fire Safety Team
FAA Wm. J. Hughes Technical Center
Atlantic City International Airport, NJ 08405

**Federal Aviation
Administration**

Under Investigation

- Radiant Panel oriented vertically in small chamber.
- We will begin evaluating wire samples in this chamber very soon.
- This test method is going to be evaluated for this application and this evaluation should not be interpreted as a planned change in test method.
- Again, the current wire test performed in the standard Radiant Panel Test Chamber is the test method we are focusing on.
- Awaiting “GoGo” cable from American Airlines for evaluation in the Radiant Panel Test Chamber.
