## EASA acceptance of SAE ARP 6199A

- EASA has never accepted the initial issue of SAE ARP6199. Revision A of the ARP was developed to adhere as much as possible to the original MOC developed by the Industry and the AAs back in 2010.
- **EASA finds that SAE ARP 6199 rev A is an acceptable MOC to the seat HR/SE special conditions.**
- EASA acceptance of SAE ARP6199 rev. A can be formally recorded in project-specific or generic MOC CRIs.
- Another option is to introduce a reference to the ARP in Specifications issued by the TC holders (e.g. Airbus Seat Frame Specification).
