

Thermal Acoustical Insulation Task Group Update

International Aircraft Materials Fire Test Working Group
Date: March 1-3 2011

Thermal Acoustical Insulation

- The Thermal Acoustical Insulation task group met in Atlantic City during the Triennial Conference.

Issues

- Some members of the task group feel that the “rule of seven” in Advisory Circular (AC) 25.856-1 is not clear and would like it rewritten.

Thermal Acoustical Insulation cont.

- The task group would like to review the measurements of the chamber and components such as: the retaining frame, sliding platform, etc.
- The damping system people would like to use pins to serve as guides for sample placement.
