First of All!

- **Big Thank You!** to all who participated in the **Approved Material List Task Group**

Task Group Accomplishments

- **Identified Manufacturer and End User benefits**
- **Developed a straw-man listing specification**
- **Regulators identified a path to use the listing**
- **Identified manufacturer interest exists to list products**

Final Concerns & Next Steps

- **SAE Model requires indefinite oversight staffed by regulatory and industry volunteers to review test plans/reports and recommend listing.**
- **How to Advertise**
- **Significant time efforts to fully release a listing specification, regulatory orders and database.**
- **And the verdict for an Approved Material List concept is...**

Waste Compartment Fire Containment MOCs

Waste Compartment Fire Containment

14 CFR 25.853(h)

All Waste Compartments, Meal Trolleys & Waste Trolleys must be substantiated by Test or Analysis.

Industry/Regulators lack harmonized published methods of compliance (MOCs) to substantiate by analysis.

Waste Compartment Fire Containment

Zodiac Aerospace has compiled approximately 15-17 MOCs accepted by various customers including our ODA.

Only a few of these are specifically mentioned in FAA ACs

The others are straight forward often using aspects of the flammability Policy Statement.

Purpose of Proposed Task Group

Harmonize and publish industry and regulator accepted 25.853(h) Similarity MOCs for waste compartments and galley trolley carts.

Develop new MOCs as needed.

Discuss test set up and test parameters- harmonize as necessary.
